

queue_curr (3 MFs)

flow_curr (3 MFs)

queue_other (3 MFs)

ext_time (3 MFs)

Number of rules: 13

	Rule
1	If (queue_curr is low) then (ext_time is zero) (1)
2	If (queue_curr is medium) and (queue_other is high) then (ext_time is zero) (1)
3	If (queue_curr is medium) and (queue_other is low) then (ext_time is small) (1)
4	If (queue_curr is medium) and (queue_other is medium) then (ext_time is small) (1)
5	If (queue_curr is high) and (flow_curr is low) and (queue_other is low) then (ext_time is big) (1)
6	If (queue_curr is high) and (flow_curr is low) and (queue_other is medium) then (ext_time is small) (1)
7	If (queue_curr is high) and (flow_curr is low) and (queue_other is high) then (ext_time is zero) (1)
8	If (queue_curr is high) and (flow_curr is medium) and (queue_other is low) then (ext_time is big) (1)
9	If (queue_curr is high) and (flow_curr is medium) and (queue_other is medium) then (ext_time is big) (1)
10	If (queue_curr is high) and (flow_curr is medium) and (queue_other is high) then (ext_time is small) (1)
11	If (queue_curr is high) and (flow_curr is high) and (queue_other is low) then (ext_time is big) (1)
12	If (queue_curr is high) and (flow_curr is high) and (queue_other is medium) then (ext_time is big) (1)
13	If (queue_curr is high) and (flow_curr is high) and (queue_other is high) then (ext_time is small) (1)
